

Database Project Proposal Form

Project

Project Title:	<i>Company Management System (Database Merged with Networking)</i>	
TA Name:	<i>Mohammed Said and Noor Mohammed</i>	
Students' names:	ID Number	Name
1-	24030034	Aliaa Mohammed Anes (Leader)
2-	24030343	Basmalah Esmail Radi
3-	24030164	Nour Nabil Nasif
4-	24030016	Mai Salah Mohammed
5-	24030141	Rofyda Yasser elsaied
6-	24030058	Farha Fathy
Statement of Problem:	<i>- In many companies, data is still managed using manual or unorganized systems, which leads to issues such as data redundancy, difficulty in accessing information, and increased chances of errors. A database system is needed to efficiently manage employee, customer, and device data while ensuring accuracy and consistency.</i>	
Brief Description of the Project:	<i>This project develops a Company Management System using a SQL database to manage employees, departments, customers, and devices. A network will also be designed using Cisco Packet Tracer to simulate a real company environment.</i>	

Technical Approach:	- <i>Microsoft SQL Server</i> - <i>ER Diagram</i> - <i>Tables and relationships</i> - <i>SQL queries</i> - - <i>Cisco Packet Tracer</i> - <i>Network with router, switch, PCs, server</i>
Expected Deliverables:	- <i>Complete database (Company System)</i> - <i>ER Diagram (ERD)</i> - <i>SQL scripts (tables + sample data)</i> - <i>Packet Tracer network design file</i> - <i>Project documentation/report</i> - <i>Presentation</i>
Objectives:	<i>Organize company data efficiently</i> <i>Reduce data redundancy</i> <i>Store and manage employees, customers, and devices</i> <i>Retrieve data using SQL queries</i> <i>Simulate a company network using Packet Tracer</i>
